ANGELINI TECHNOLOGIES

Angelini Technologies is the Angelini Industries company which, through its subsidiary Fameccanica, specializes in advanced technological solutions and services for logistics, consumer goods manufacturing, and battery production.

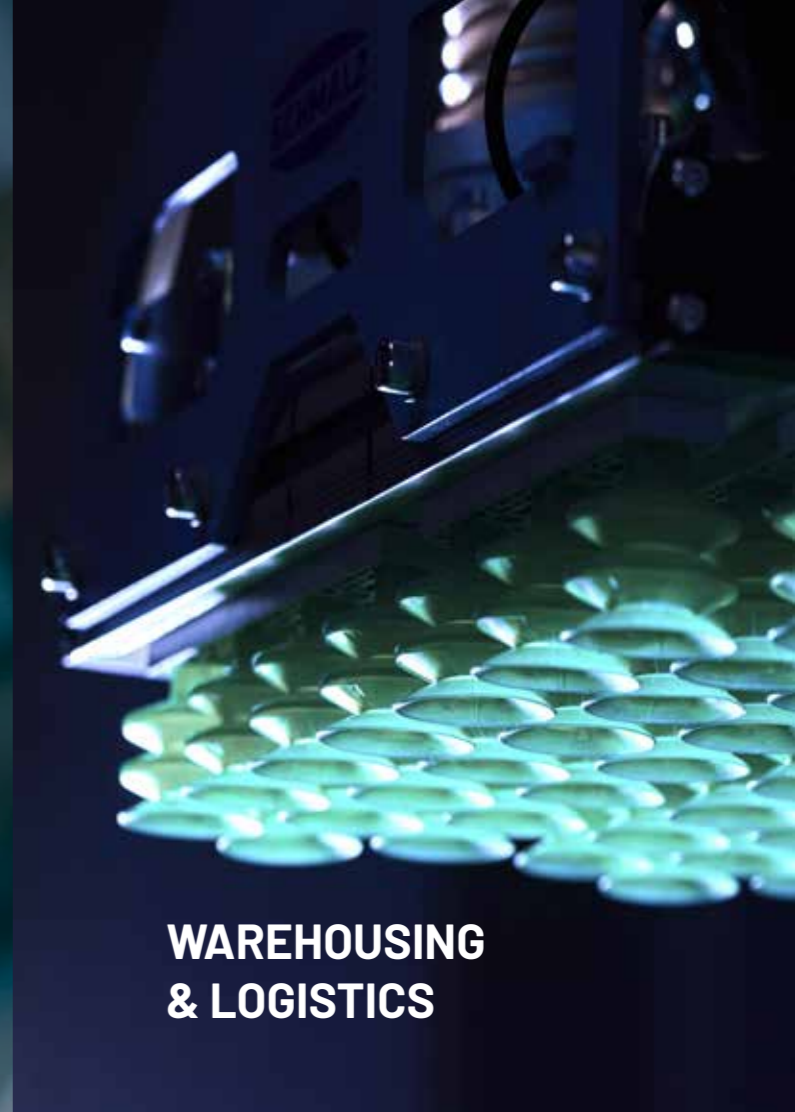

Since its foundation in 1975, Angelini Technologies - Fameccanica has built more than 1,300 production lines, sold in 72 countries. Its more than 700 employees, including 200 engineers, operate across three countries: Italy (San Giovanni Teatino, Chieti, and Alanno, Pescara), China (Shanghai), and the United States (Cincinnati, OH and Boston, MA).

The company specializes in raw material converting machinery, robotic systems, and battery assembly solutions, complemented by proprietary advanced software, and service offerings that ensure proximity and support across the entire lifecycle.

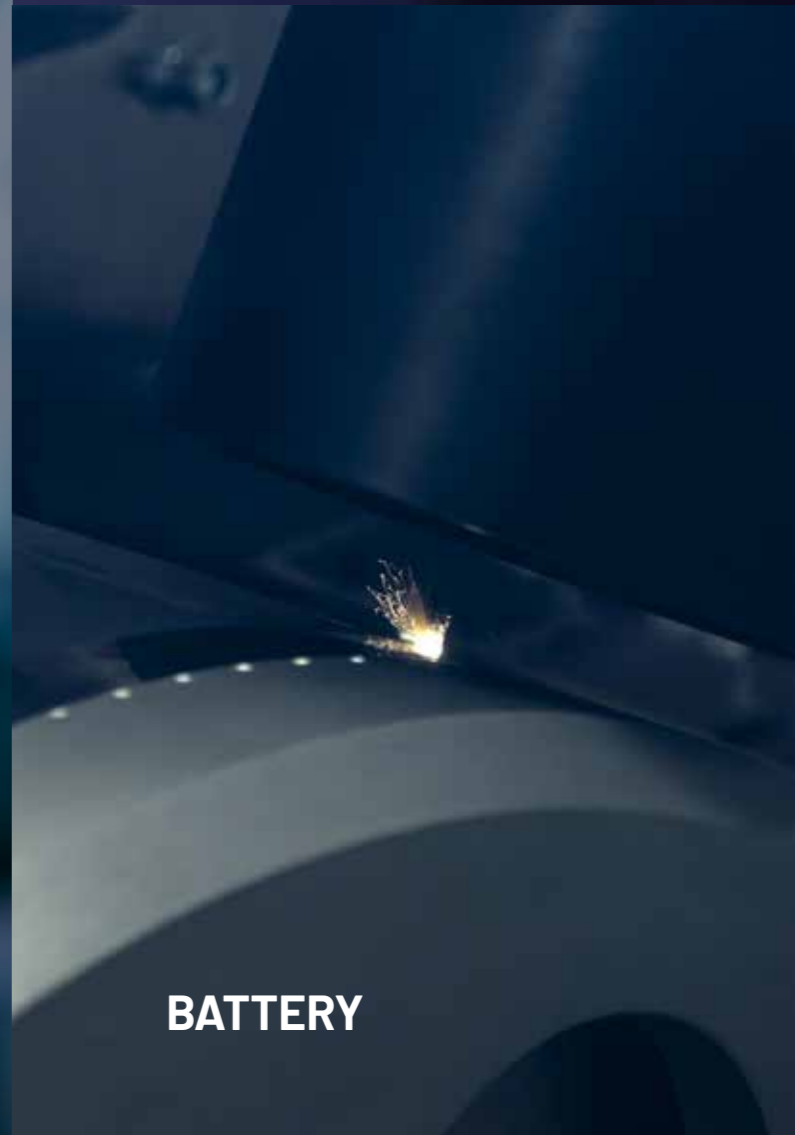

BUSINESS AREAS

Excellence in execution, customer-centricity, and innovation guide everything we do. We are committed to delivering high-performance industrial automation solutions through an increasingly integrated and synergistic approach. By placing our stakeholders at the heart of our strategy, we strengthen our ability to act as a reliable and forward-thinking partner throughout their entire journey.

We aim to reinforce our leadership in Hygiene and Home & Personal Care and accelerate our growth in Warehousing & Logistics, and Battery industries. With more than 50 years of technological innovation behind us, we remain focused on anticipating customer needs, exceeding expectations, and delivering excellence at every step.

& LOGISTICS**

**HYGIENE AND
HOME & PERSONAL CARE**

BATTERY

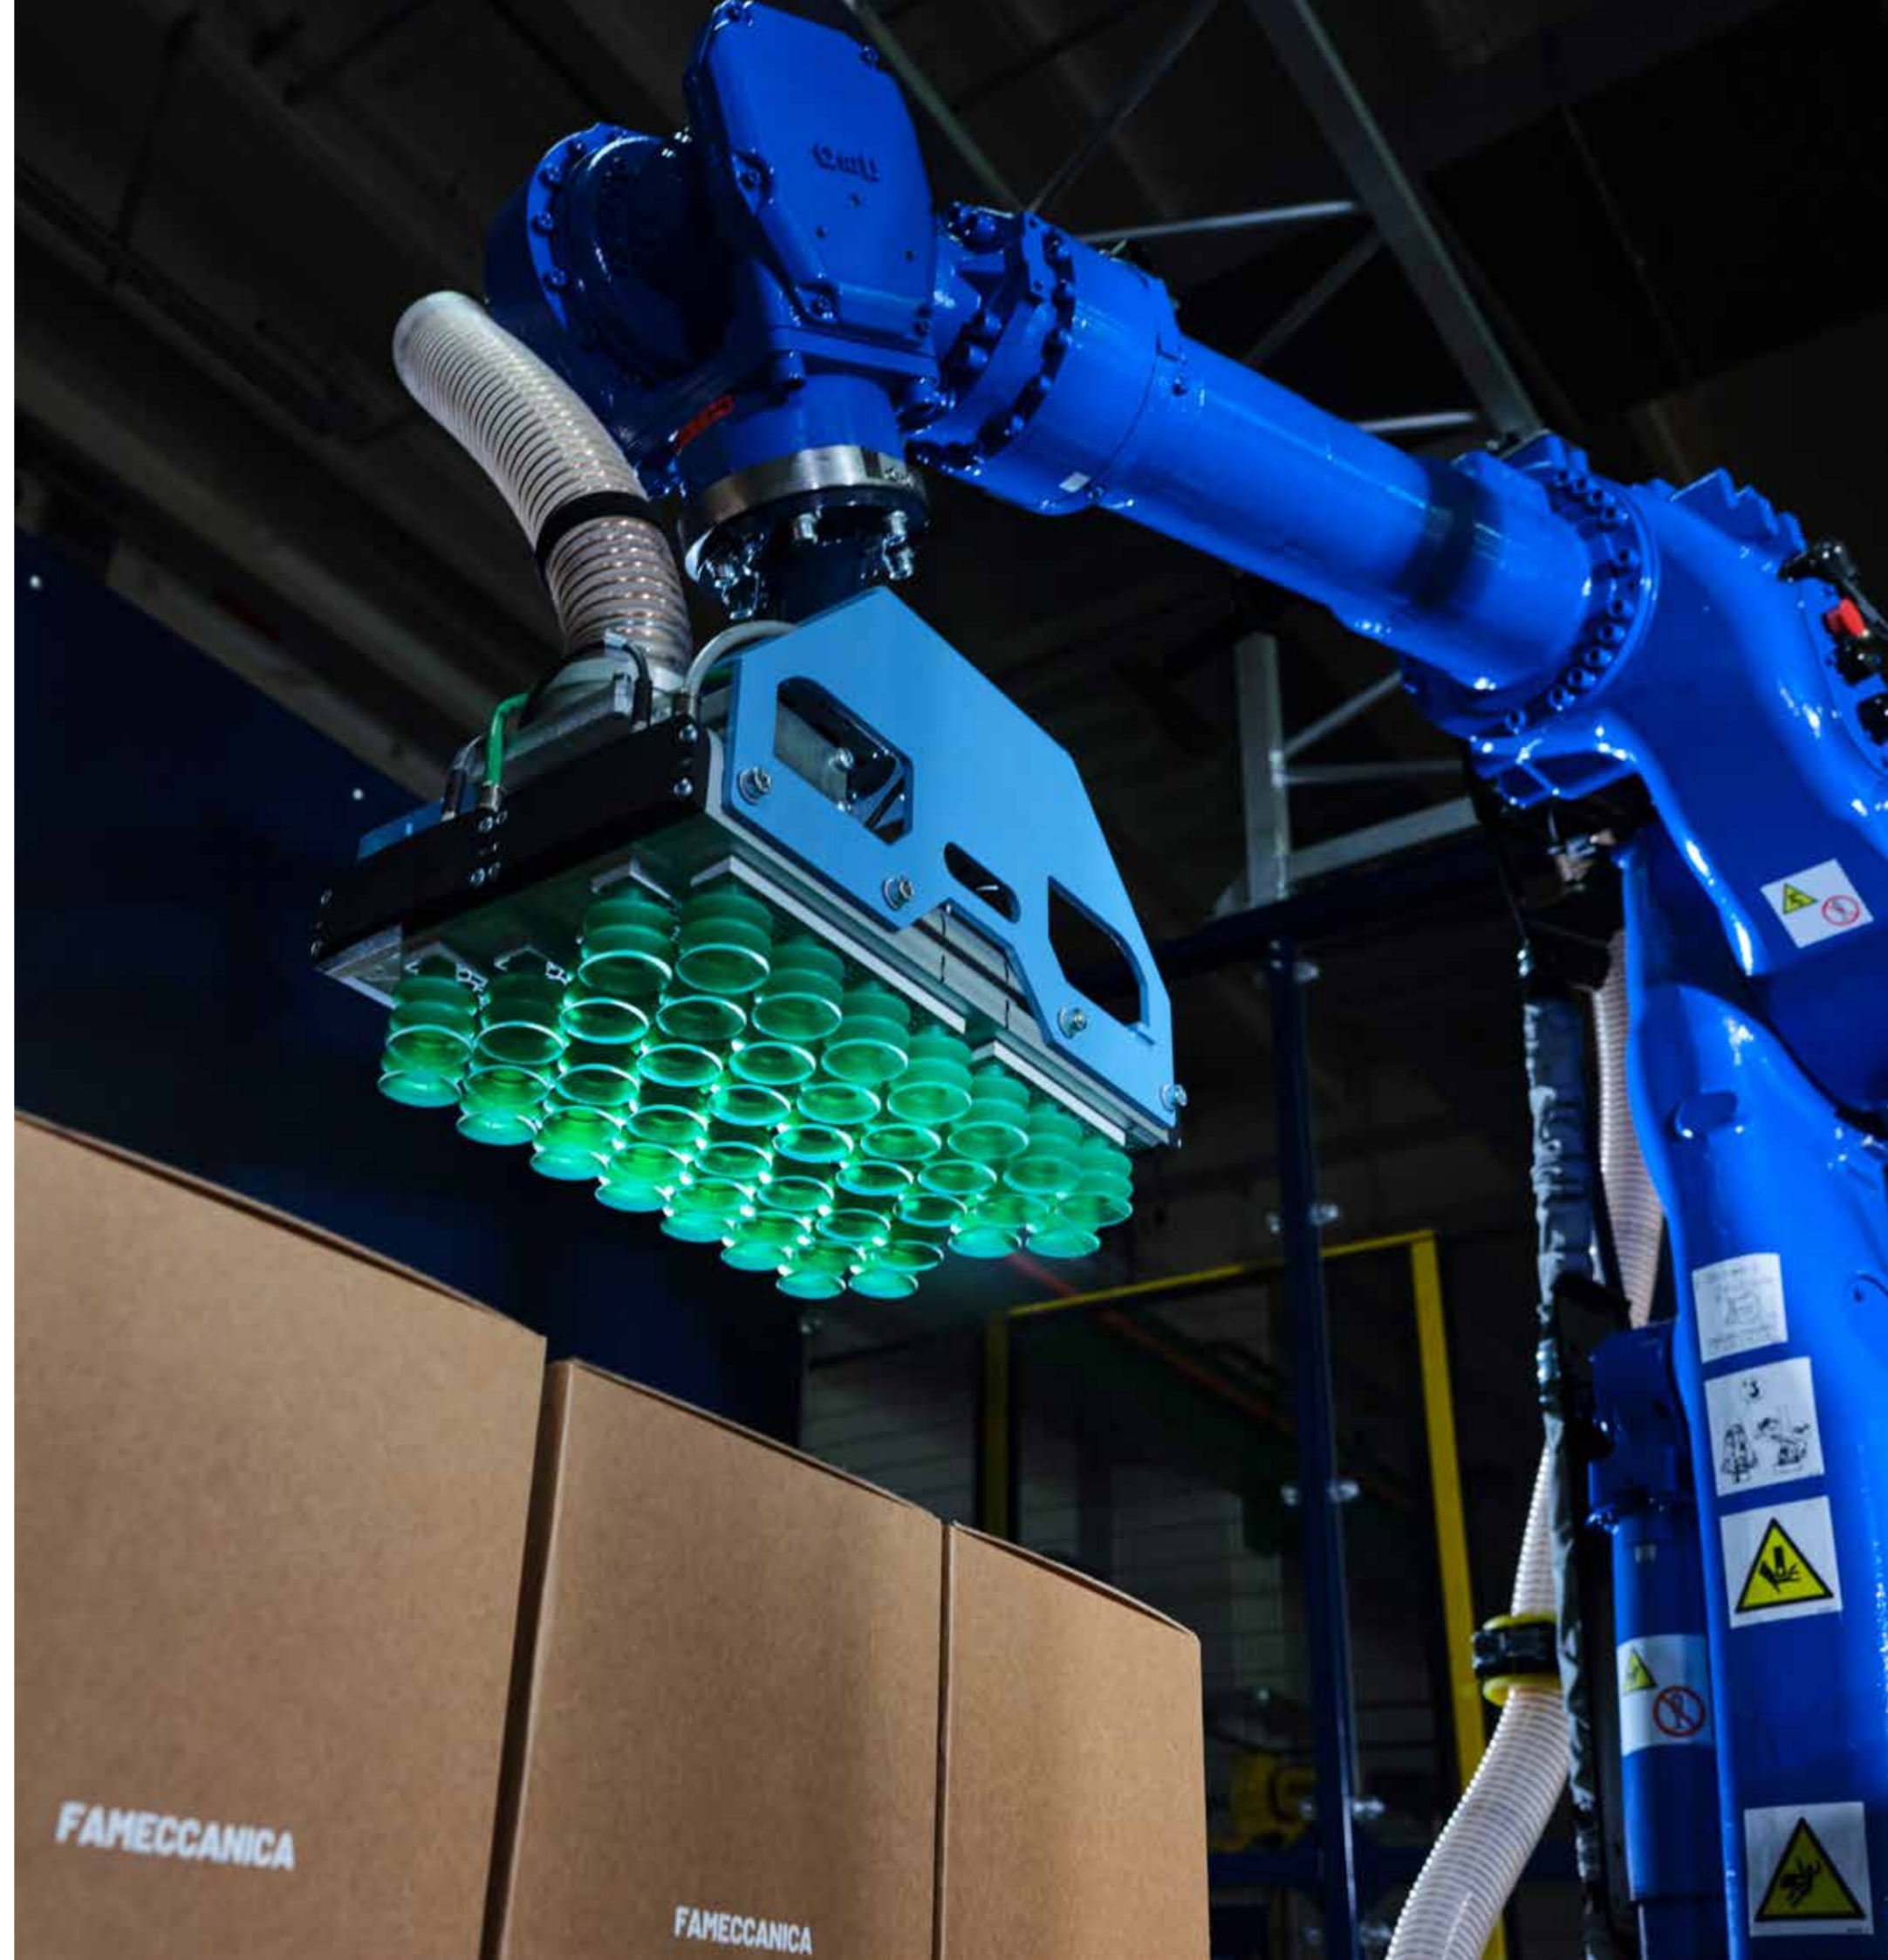

HYGIENE AND HOME & PERSONAL CARE

We design, build, and install machinery and production lines powered by our proprietary software, leveraging our deep expertise in converting technology.

We **focus on Hygiene** and **Home & Personal Care**, including items such as **diapers**, **adult incontinence** and **feminine hygiene products**, and **monodose detergents**.

WAREHOUSING & LOGISTICS

We design, realize, commission and install **robotic systems and automated machinery robotic cells powered by advanced software stack based on physical AI**. Thanks to our recent partnership with LABO, we are committed to delivering cutting-edge technological solutions for the loading and unloading of trucks and containers.

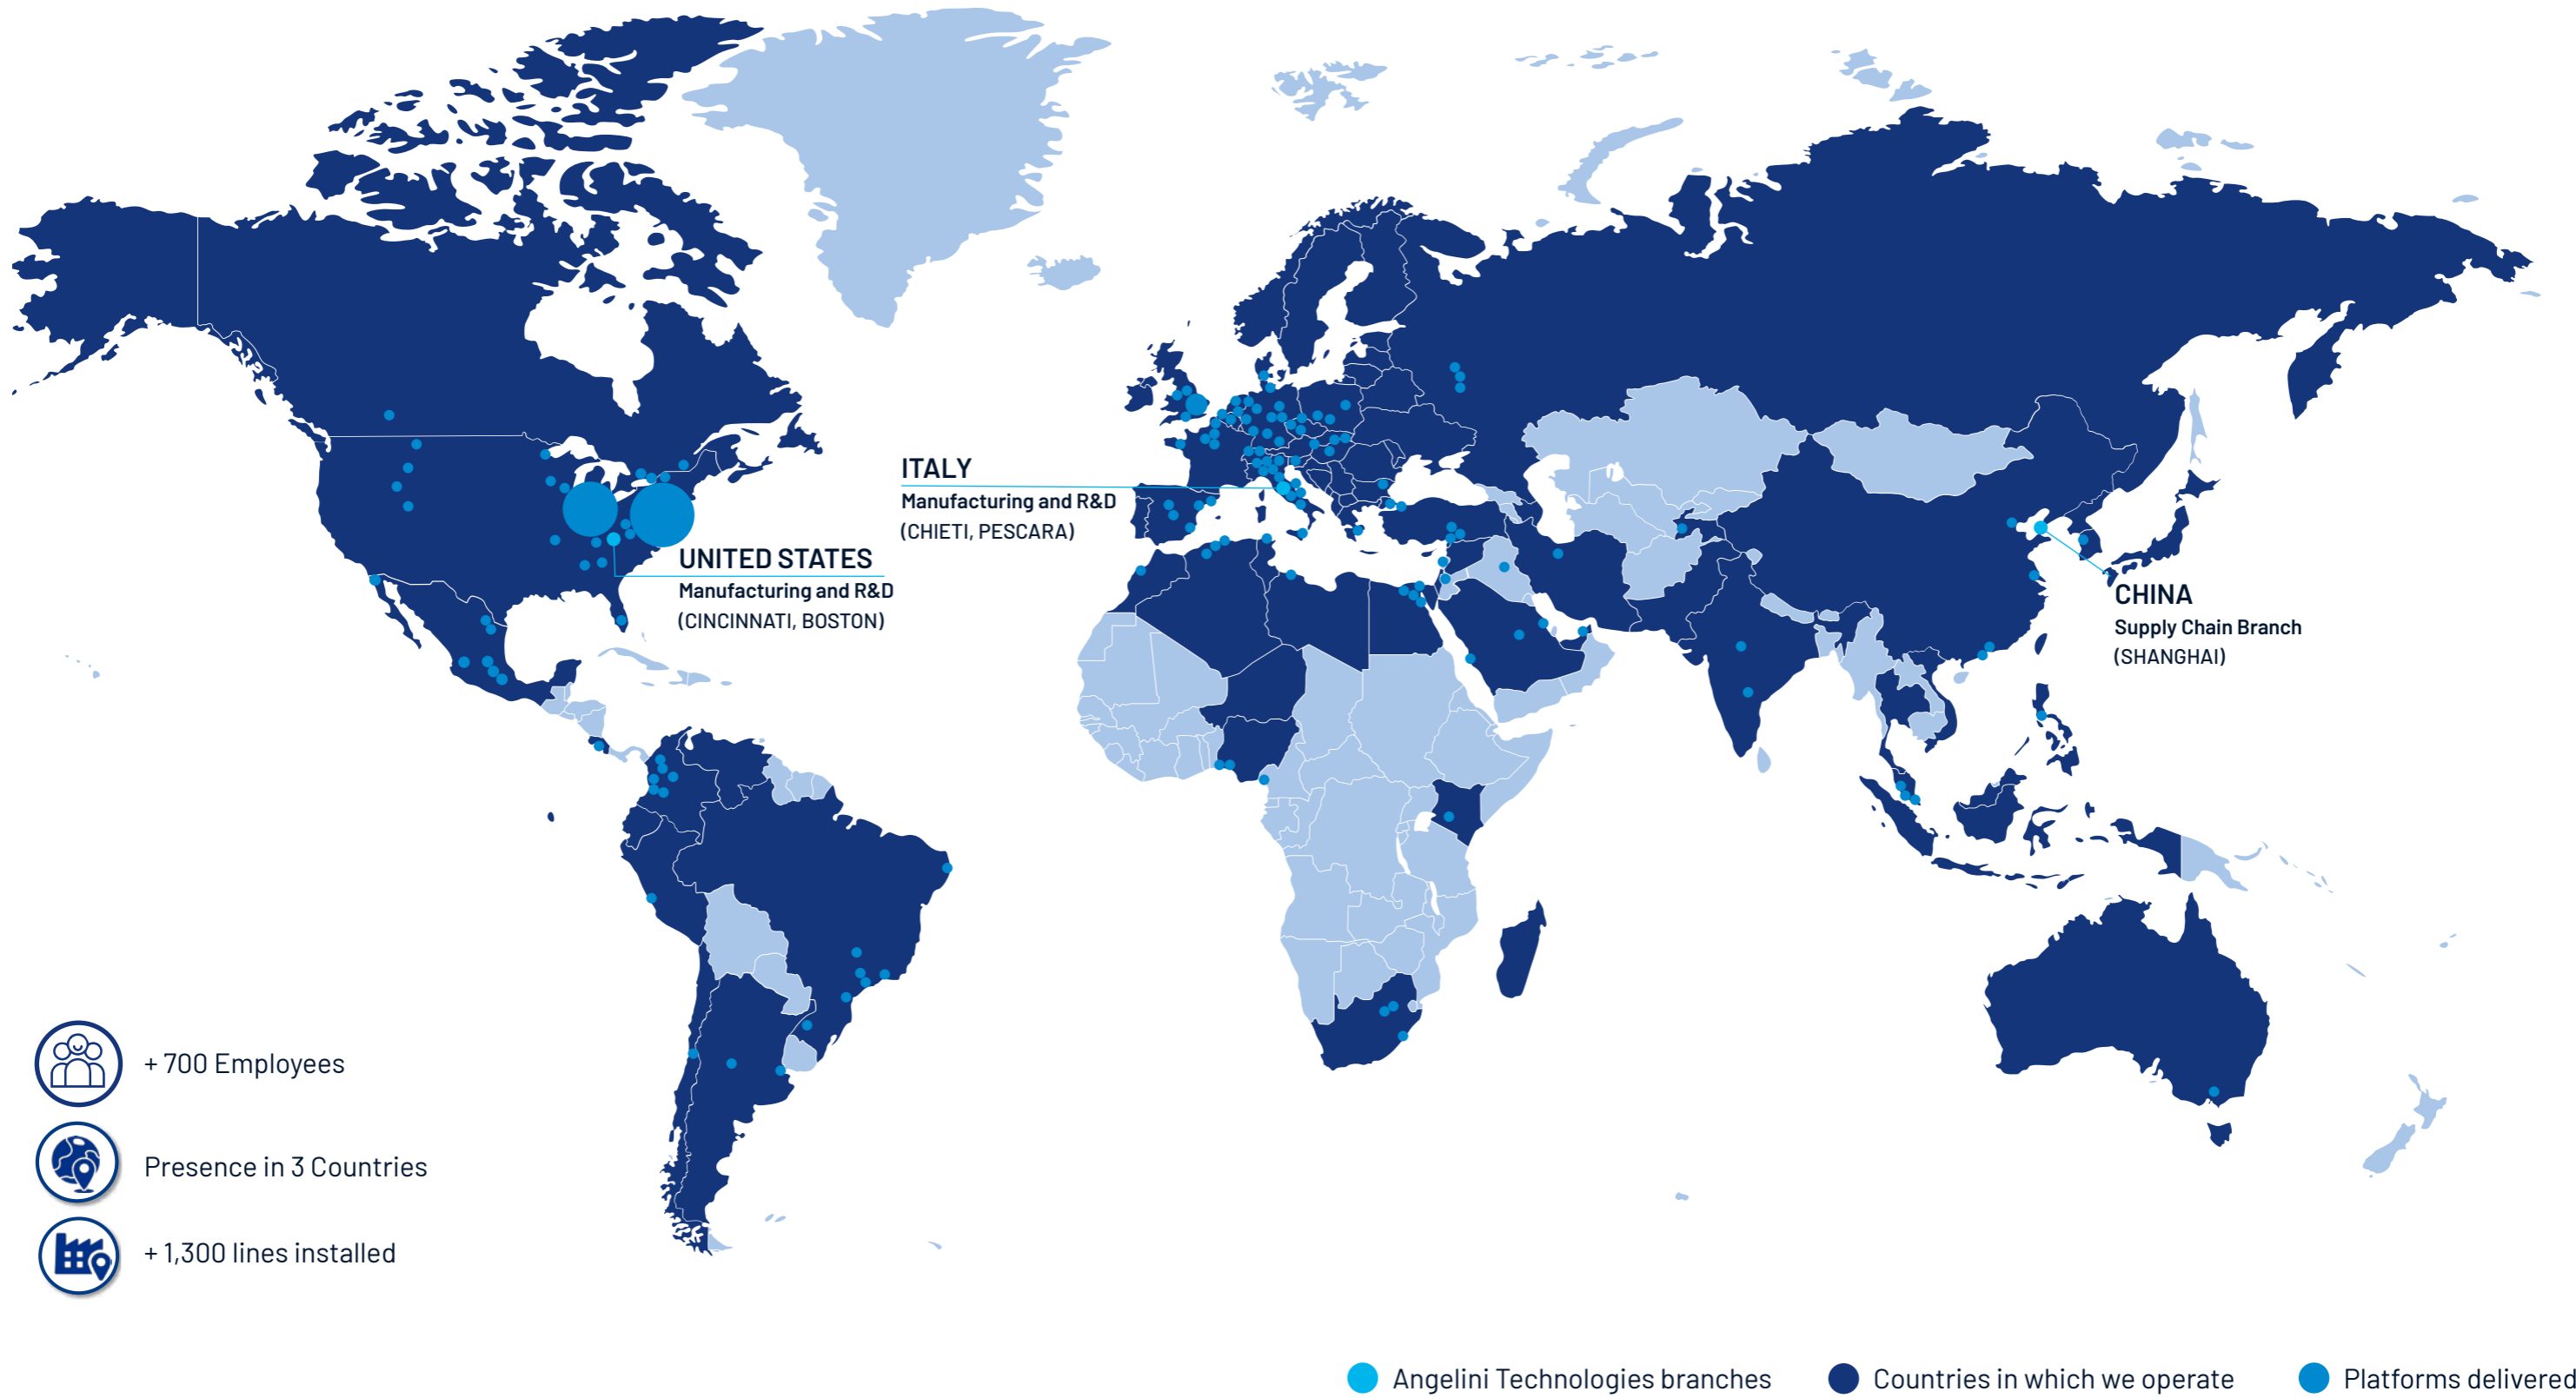

BATTERY

We design solutions by relying on **laser cutting, high-speed, and high-throughput technologies** eliminating industry bottlenecks, by leveraging over 50 years of expertise in **roll to roll**. Thanks to our **state-of-the-art lab**, we deliver top-quality prototypes that are rigorously tested to ensure unmatched quality for battery manufacturers.

SERVICE

For every solution we deliver, we provide a dedicated Service that includes professional training, local and remote technical support, spare parts programs, rebuilding services, upgrade kits and advanced services based on machine data.

*The map shows the countries where we installed our systems in the last 10 years.

ANGELINI TECHNOLOGIES IN THE UNITED STATES

Angelini Technologies has operated in the United States since 2009 through its subsidiary Fameccanica North America Inc., that delivers cutting-edge solutions and advanced services for logistics and consumer goods manufacturing, including complete product configurations and upgrading kits.

Since 2026 has partnered with LABO, a US-based robotics company with an R&D center in Italy, that is pioneering automated robotic loading and unloading for containers and trucks.

OUR HISTORY

1970 – 2000

Foundation and Development

- **Fameccanica** is founded by the Angelini family as a company specialized in the production of **machinery** for the **absorbent hygiene** products industry.
- **Angelini and P&G** establish a joint venture to manage **Fater** and **Fameccanica**.

2000 – 2020

International Growth

- Fameccanica's solutions are deployed **worldwide**.
- The company opens new manufacturing plants in **Cincinnati, USA**, and **Shanghai, China**.

2020 – Today

Acceleration Toward Robotics

- **In 2022, Fameccanica** becomes 100% **part of Angelini Industries**.
- The **Robotics Business** is launched.
- **Innovative solutions for battery** production are developed.
- A partnership with **LABO** has been established.

**With the Angelini
Industries Group
we share the values
and the principles
that guide our actions.**

Underlying our Group identity and culture are four founding values, which inspire and guide and give life to all our daily choices, actions and interactions.

ETHICS & RESPONSIBILITY

We care for our employees, patients and consumers. Respect for the highest ethical principles underpins all our actions, and our decisions are guided by a long-term perspective. We are committed to ensuring the sustainable economic development of the company, safeguarding the environment and the communities in which we operate.

PERFORMANCE

Each of us is responsible for achieving our own and the Team's goals. We are determined to make things happen and to give our best in all circumstances, with speed, rigor and transparency. We pursue excellence, constantly striving for ambitious goals. We face difficulties with determination and resilience.

INNOVATION

We encourage the development and testing of new, effective and practical solutions. We challenge the status quo. We manage the complexities and demands of an everchanging world. We take responsibility for bold choices for business growth and development. We learn from our mistakes and pursue continuous improvement.

ENGAGEMENT

We are positive, motivated and open to new ideas, styles and perspectives. We promote collaboration within the group. We value skills and reward merit. We share and celebrate the successes of our company and those of our people.
